SUMMARY

Fresh graduate in Informatics Engineering from Sam Ratulangi University with experience in software development, system documentation, and business process automation. Built web and mobile apps using Flutter, Laravel, and JavaScript, and familiar with the full SDLC from requirements to deployment. Passionate about understanding user needs and creating products that are both functional and intuitive. Eager to grow as a developer in a collaborative, creative environment and contribute to building impactful digital solutions.

EXPERIENCE

QA Intern (Kampus Merdeka) - PT Mekar Investama Teknologi (August 2023 - January 2024)

- Designed and executed manual test cases to validate software features and user interface components.
- Performed API testing using Postman to verify endpoint functionality and data accuracy.
- Created and maintained testing documentation, test reports, and issue tracking records.
- Identified, documented, and reported software defects throughout the development lifecycle.
- Collaborated closely with developers and QA engineers using Jira to track bug resolution and improve software quality.
- Participated in software validation activities and contributed to quality assurance processes within an Agile development environment.

Programmer Intern (Maganghub Kemnaker) - BLSDM Komdigi Manado (Nov2025 - May 2026)

- Developed and maintained web-based applications and administrative systems using Laravel, Flutter, and Google Apps Script.
- Gathered business requirements from stakeholders and translated them into system features and workflows.
- Created system documentation, workflow descriptions, and user guidance materials for internal applications.
- Participated in application testing, issue identification, and system improvement processes.
- Managed application data and supported operational reporting activities.
- Collaborated with users and stakeholders to ensure system functionality aligned with business requirements.

Programmer - Team Participant — Kontes Robot Indonesia (KRI) (2024)

- Co-developed and programmed a robot for traditional Indonesian dance sequences.
- Implemented motion control and timing choreography, tuned motors to reduce jitter.

Kampus Merdeka MySkill Future Skill Program – PT Linimuda Inspirasi Negeri (2024)

- Built a smart system using ESP32, DHT22, and MQ135 sensors
 - Applied Mamdani Fuzzy Logic to control fan speed and ventilation automatically
 - Connected the system to ThingsBoard Cloud for real-time smartphone monitoring
 - Conducted experiments to evaluate system performance for air quality control
-

EDUCATION

Bachelor of Computer Science Universitas Sam Ratulangi Manado (2021-2025)

- GPA: 3.92
 - Research Focus: Internet of Things (IoT) for smart environmental controlling and monitoring system
-

ADDITIONAL INFORMATION

- **Technical Skills:** MySQL, HTML, CSS, JavaScript, PHP, Python, C++, Laravel, Flutter, Git& Github, jira, Postman, Software testing, SDLC, Google Workspace, Microsoft Office, .
- **Languages:** Indonesian (fluent) & English (Intermediate)
- **Certifications:** QA in SDLC - Myskill, Python Programming Basics - Huawei, AI - Huawei.
